CCR No. 96-0255	Logged Date 3/11/96	Rev.	Request Type CCR
Priority Routine <input type="checkbox"/> Urgent <input type="checkbox"/> Emergency <input checked="" type="checkbox"/>	Affected Release A		Change Class II
Title (description) Erik Fiegel needs pseudoroot permission to investigate ECS Login ability; more platforms needed.			
Documents Affected n/a		Source Nos (RID, NCR, etc.) or Tech Reference n/a	
RTM Change <input type="checkbox"/> Start New Baseline <input type="checkbox"/>			
Problem Erik Fiegel needs pseudoroot permission to investigate ECS Login ability. This is a requirement of MSS and CLS. I have proposed a solution which involves using the standard X Display Manager (xdm). However, to experiment with this technique -- to learn its capabilities and limitations, which much be done in the next week or two -- Erik will need to edit various files typically owned by root.			
Proposed Solution Give Erik pseudoroot (sudo) permission on all ECS platforms, and specifically: 1. SGI - Lucy, 2. IBM - Ricky, 3. DEC - Boston, and 4. HP - York. The commands he will use are not completely known, but I'd guess at least these: vi, emacs, ls, cd, pwd, rm, mv, cp, ps, kill (to stop an xdm or related process).
